Half Yearly

Quarterly

Monthly

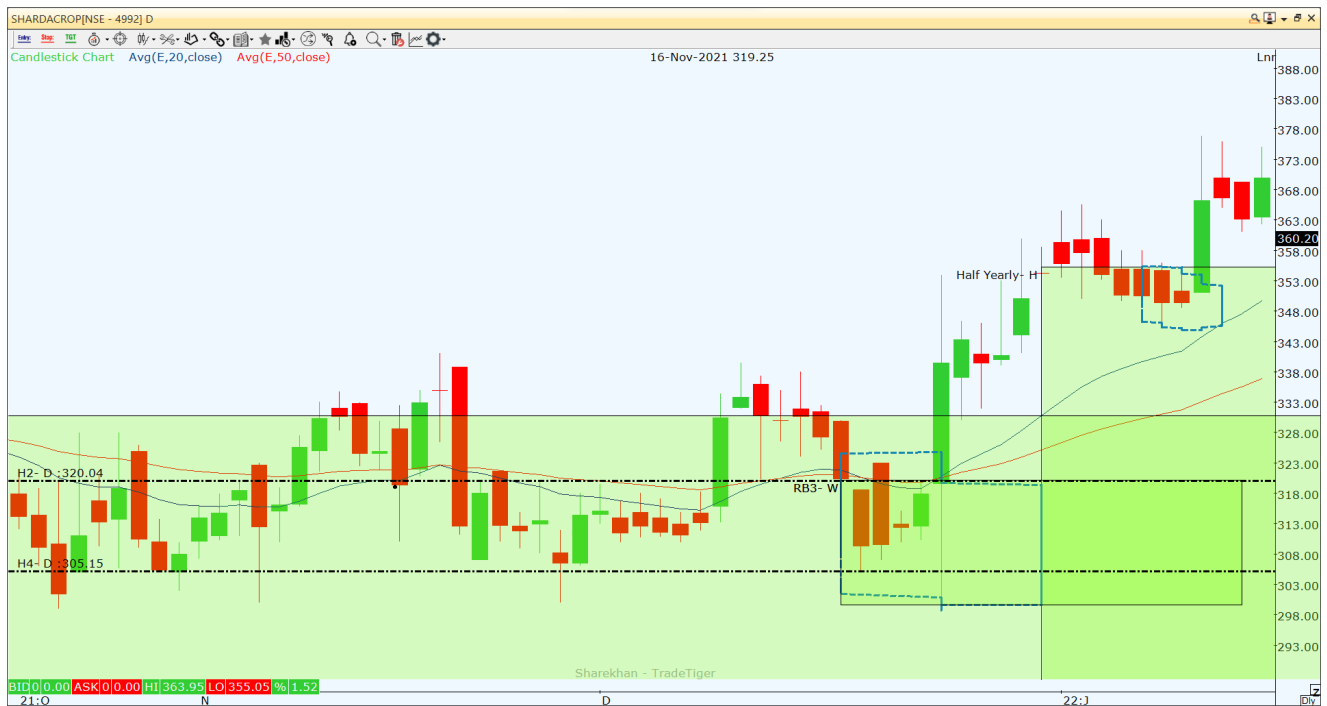

Weekly

Weekly pei yeh jo drop aur rally ko circle kr ke rakha hai unn dono ki wick ko, Demand zone ki tarah consider kiya ja sakta hai aur ho sakta hai ki daily mei boht hi achi aur clear picture mile.

Daily

Currently price ko iss kuch area ne rok ke rakha hai joki ekdam garbage type area hai pr waha se rally achi ayi thi aur half yearly ka proximal bhi hai isiliye 3-4 din se price vaha pei ruki hai.

Proper trade aur conservative approach rakhnek k liye niche mark kiye hu drop base rally ka wait krna chahiye. Entry mark kr sakte hai 322 aur SL around 302 ke (Proximal 320-Distal 305 pei hai daily k DZ ki).

Achi baat yeh hai ki daily pei pura garbage dikh raha hai 430 tak ho sakta hai yaha pr price thode din ruke aur phir 530 ke next weekly supply tak jaaye, toh target toh acha khasa mil sakta hai. Chuki yeh garbage dikh rhe hai zones isliye trend k khilaaf trading krne mei itna issue nahi aa rha confidence ka agar boht hi ache supply zones dikhte toh confirmation entry plan krni chahiye.

Achievement location ki bhi hai aur execution ki bhi hai ki consolidation ko khatam krke previous high ko todd ke naya all time high diya hai. monthly pei bhi golden crossover hai location pei aur daily pei bhi golden crossover hai execution vali zone pei.
